

ZAID EL YOUNOUSSI

TRAINING :

I am a third-year student at SUP'ISI in Tetouan. I have in-depth courses in programming, databases, networks, and security. My program includes practical projects for a concrete application of my skills.

PROJECTS :

LOCAMOTO :

2022

It is a desktop application in C language for managing the rental and return operations of motorcycles within a rental store.

PRESSNETWORK :

2022

This is the website of a media press organization. The site broadcasts information on various events in different categories such as sports, culture, politics, etc....

SECTION 1 :

2022

A website for 'Security Company Section1' that presents the services and activities of a security company.

ARCHIMA :

2023

The website aims to facilitate the connection between architects and potential clients by providing an online platform.

SYSTÈME DE GESTION :

2023

The Project Management and Monitoring System is designed to track projects, their tasks, involved members, deliveries, and associated comments. This project is developed in VB.NET with a database under Microsoft Access.
